
TidalShift Assessment

DISC® Assessment

The results of an individual's DISC® Personal Profile can then be compared to the behavioural expectations for the specific role.

TidalShift is certified and uses the DISC® series of assessment tools and associated processes to define behaviour expectations for specified roles. The results of an individual's DISC® Personal Profile can then be compared to the behavioural expectations for the specific role. Gaps can be identified and strategy to meet role expectations can be developed. This assessment tool can be used at the individual level as well as for team performance and development.

Contact us to find out how you can learn more about how these assessments and programs can make a difference for individuals and core groups within your organization.

The following is a list of our programs that leverage DiSC® assessments:

- Building and Sustaining Project Teams
- Recognizing and Removing Barriers to Performance®
- Improving Team Effectiveness®
