Michael Lemiski, is a results-driven Senior Project Consultant and Facilitator with certification in TidalShift's extensive training programs. Michael has over 20 years of experience working as a project office director, engineering manager, project and portfolio manager, consultant, and project planning facilitator. He has a proven track record advising and leading multi-disciplinary project teams in engineering and technical services, communications, rail and air transportation, information systems, financial services, and leading edge technology projects.

With over 15 years of direct project management experience, Michael has led a number of successful projects. As an engineering manager and project manager, he oversaw power plant design modification initiatives valued at up to 30M\$. As a director with responsibility for managing 18 IT project managers, Michael led the implementation of a Project Management Office.

As a training specialist, Michael develops and delivers courseware in both corporate and graduate school environments with a keen focus on project scope, schedule, and cost management tools and techniques.

Michael has a wealth of experience in establishing PM offices, implementing PM processes, and both standalone and enterprise PM software tools. He works effectively with all levels of the organization and is a solid facilitator for project planning and project management process implementation.

Michael has a Mechanical Engineering Degree from the University of Toronto. He obtained his Project Management Professional (PMP) certification from the Project Management Institute (PMI) in 1994.

Michael finds creative expression in photography, and in an eclectic mix of music performance on electric bass cello, and vibraphone.
